Hair Master Download [Updated-2022]

Hair Master is an entertaining tool that packs a few fun features for performing a digital makeover. Hair Master combines a number of useful functions that let you enhance your pictures, applying an array of custom presets or starting from a collection of photos you have uploaded to the application. The interface is plain and easy to navigate. It has a wizard-like layout and only two steps are needed for performing a new project: adjust the picture brightness, contrast and RGB levels, and enable face recognition by tracing face features (e.g. eyes, eyebrows, lips). In the next steps you are required to specify a name and gender, after which you can select the face, eye and lip form, hair length and type, fringe, glasses and height. Moreover, you can choose the color type (for skin, eye, hair, lips), in order to receive personal beauty recommendations. Hair Master provides plenty of hairstyles and accessories, and you can filter them by specifying the occasion, view mode, style, and other parameters. Other tools let you highlight the hair, apply image effects (e.g. greyscale, blur), rotate or center elements in the picture, zoom in and out, as well as manage multiple layers. The application uses a moderate-to-high amount of CPU and RAM, has a good response time and works well, without causing the OS to hang, crash or pop up error dialogs. Nevertheless, Hair Master has not been updated for a pretty long time.
