Each icon is pixel perfect so you can use it in any size you want. File type: Icon Want to own it all, Mac and PC? Of course you do. Now you can get it all for \$39.95. Need a specific file format and don't want to do the legwork of manually converting the files? No problem. ConvertMyFiles for OS X and ConvertMyFiles for Windows are universal applications that allow you to transfer files from Mac, Windows or any of your other platforms into the other platform without using a single ounce of hard drive space or any of the other resources you normally would spend doing such a task. You simply need to add your files and click start. Whether you are a Mac user looking to get your files off of Windows or vice versa or simply want to convert your old files from one platform to the other, this is the software you will be looking for. ConvertMyFiles for Mac/PC is being released for the first time. It has never been easier to get your files from your Mac into your PC or vice versa. It's made easy and straightforward so that you can be up and running in no time at all. Also included in this version is a mini converter allowing you to simply convert the format of your files into another format. Simply add the files you want to convert and ConvertMyFiles will do the rest for you. Select any file extension of your choice, specify a directory or multiple directories of files and click start. ConvertMyFiles does the rest for you. I have used the Apple computer (Mac) for more than 15 years. I still love it! The time I spend with my Mac is very valuable to me. I have no interest in getting rid of it, and neither should you! Although my work requires me to use a Windows computer (at home and at work), I am often at my Mac during the day. Unfortunately, I find that many of my files on my Mac are not compatible with a Windows environment. The only way I have been able to transfer my files from my Mac to my Windows desktop is by using ConvertMyFiles for Mac/PC. It is more than simply converting the format of your files. ConvertMyFiles for Mac/PC also works with your files, which means that you can go to your Mac and browse your files, drag and drop them into your Windows desktop and they will be transferred without the use of any additional software or
