ABOUT ELDEN RING SOFTWARE: Elden Ring is developed and published by Illwinter and distributed by Cygames. It is free to play, however, it can be purchased if you want to have additional content and get additional benefits. You will be able to access these benefits in the "Sell" and "Gift" sections of the store. You will also be able to access the content of these benefits after you have purchased the game. YEAH RIGHT, YEAH, YOU CAN FEED IT TO THE SHEEP FOR 4,000 VALUABLE SP, WE'RE GONNA MAKE IT SO THAT YOU CAN STAY IN THE GAME, PUT IN A FEW HOURS AND PICK UP YOUR FUSILIER OF THE MIGHTY AND WATCH IT WEIGHT OVER YOUR HEAD, THE TITLE OF "LORD OF THE MIGHTY". I guess I could go pick up a few bucks more and get a staff. This game is free, not a let me get paid like most of the free to play games out there. The game is free to play, not free to be shit in. I feel like I can't say that enough times. for example, let's say, literally half the game is free to play for you. so you can do whatever you want and it doesn't matter what you do. It's still a free to play

game. there are things like the 10 class challenge where you have to put in say 10hrs for your character and still be able to complete it. this will net you a binder like the character item or whatever that will allow you to get items or that much weaker pvp stuff. so what we're seeing is this weird hybrid of F2P and P2W that tries to play around with the term F2P. it's still a free to play game and you are getting paid to play it. im all for people being able to play for free. i just think that people should have to put in a bit more then 4 hours a day to get past being

necessary care taken to update the character to it. There are some drawbacks during the update though. [Character Design] I am not so confident about the improvement of the character design. I'm surprised to see the character line is stained by black lines. The yellow eyes are more supple and the left ear is carefully crafted to really present a user-friendly design. The details are carefully adjusted. [Story] Storyboard is a bit thin and I am not sure if it is coherent. There are 4 main story elements, there is much to talk about this. Storyboard Improvement The story flows in multiple episodes. The early game is just to explore and get familiar with the game and the world. There will be a lot of enemies to fight in order to explore the world. The 1st episode introduces the main character: Tarnished, a traveler who is driven by greed and hate The 2nd episode introduces the new magic: A spell that enhances physical attacks into physical force. The story will begin to be full of the 3rd episode with the appearance of the protagonist. Lastly, the story begins to progress in the 4th episode. There is plenty of stories to be told. - The storyboard is basically the same as in the previous game - There is no considerable developments to the story. Character Design: 1st main flaw: Even though the character design is nice in some areas, it is stained by the black lines. The level is high. 2nd main flaw: There are tons of lines and details and the colors are not enough for the panel. It's hard to really notice the changes.

[Game Play] The game becomes enjoyable if you play it with a friend. You can give a lot of time to the story and combat. - The starter items are great. It takes a while to play the game, but you can enjoy the adventure while leveling. - The combat would be a trouble if you play by yourself. The balanced of the game depends on your character. You should be skilled enough to learn or improve with level ups and items. [Control] There are some control issues in this game. The game is not easy to play. There are many things to learn. - As bff6bb2d33

time. That way, the movement of your character will feel more responsive. Concentrate to steady the rotation of the shield. \* Fighter's Training will not be distributed as rare drops. \* You will get a certain number of "drops" from NPC battles that you fight. You will start with these drops and if you continue to fight more battles and defeat NPC, these drops will increase. You can increase your drops by increasing the number of battles you fight. The number of drops you get will increase with the strength of the items dropped. Once you have used these drops, you will not receive any more drops. "\* The top-10 rankings of the item drop rate in NPC are determined by a statistical test conducted in a certain time period. In the same way that eNG\_Mastery\_Guilds (v1.0) increased the number of drops with the number of battles fought, this system will increase the number of drops with the level of the items dropped. If you have gathered a level of experience, you will be able to find a low-level item drop. In addition, there is a fair warning icon on the NPC that indicates the drop rate of the item. If you see a fair warning icon on the NPC, do not fight that NPC. Also, if you fight NPCs that give a fair warning, you will not be able to gain experience from your Battle Rewards.
