No money, no problems, a new arena every time you start! Area mode, the original arena game mode! More controls and improvements than ever before. Advanced health, stamina and armor system. New ultimate abilities. Extensive upgrades. And much more. Welcome to the Arena. That's right, we have made a new arena mode in AeternoBlade! We really felt that the original arena mode was lacking since it is only a part of the original Arena. We have now made some big improvements to all aspects of the original mode that make it more enjoyable. Also, we have added new things, not only minor improvements. This game is not an easy one! If you are used to the normal game mode of the original AeternoBlade, then you are at the wrong place. This game is pretty much a whole different world. You can now reach the highest level without using special characters. Things like the recovery attribute and such will not be needed to get to the highest level anymore. This might take some time for you to get used to, but just forget the concept of the normal modes. This is the Arena. But, so you don't have to think about it, we have added a lot of tips to help you get a feel for the arena. It's not all as bad as it seems to be! This Arena mode gives you a new life, a new adventure! The main reasons are: 1) Better controls 2) A completely new arena environment 3) Improved skill moves and special character skills 4) More health than before 5) More armor than before 6) Better feeling of the game All characters will be the same on this mode. All characters will have the same equipment and items. The number of cities will also be the same as before. At least, all of the characters will have the same equipment, skills and abilities. Item selection will be the same for all character in this mode as well. It is possible to select items and equip them in different ways when playing this mode. New Items and item effects will also be added to this mode. At the top is the introduction of the character's skills and equipment. You can see the information. But most of all, you should look at the skills of the characters. For example: you look at the characters of a blue mage. You can see his attack

### **Picross Floof Features Key:**

- Stealth tactics

The anime style visual novel with more than 200 scenes

- Mature content

Mixed dialog, cutscenes and art style will make you feel like you're playing an independent game

- Wonderful voice and music

Michel Tempo's soundtrack and the voice acting are stunning, giving it its own special charm.

- A variety of plots

Hook up the ship, hook up the girls or hook up the sea! ( story wise, there's always something to do in Driftwood )

- A mix of music, dialogs and CGs

All of the scenes in the game are mixed into one. This means that you can listen to Michel's music while reading the dialogue or view CGs during the scenes! This is very immersive, considering that you've got a really large variation of themes to choose from.

- Accurate dates of the setting

This game takes place in the near future - 100 years ago, for both countries / states of modern day Japan and South Korea. The events of the game take place in the Southern part of the sea off the island of Chichirogi. The game tells a whole story, as well as how the history of these countries and their societal issues developed over time.

- An active and nice community

As the total number of users of the Visual Novel is growing, there are a lot of people trying to share information with each other and others with various hints, tips and solutions that they've developed. If you drop by here, you'll often get the chance to be involved in a new adventure and meet new people who've gone through similar experiences.

- Betas ( available after 2 Weeks of Launch )

Fortunus as a Visual Novel company doesn't think that releasing a game is a problem. This visual novel is meant to be played, so why shouldn't we release a beta? This is very important

Create your own musical vision with Candyman from Superbrothers' new game, SURVIVE! Last month, the world lost a musical genius. He was called the Galileo the Funky Saxman, and he spent much of his life creating musical beauty. He was also the host of the LATE show LESSOLICIOUS, which he played exclusively online. News soon broke that the show had been cancelled, and when they didn't return his calls, LESSOLICIOUS's fans launched a campaign online to seek out their favorite host and bring him home safely. Over the course of 3 months, the campaign spread around the world and the entire internet listened. Until the day his body was found amongst the wreckage of his studio. A VAGUE claim about the homicide was soon circulated online, but those who knew LESSOLICIOUS were shocked to find that he was found with the blood of a cherry on his lips and with a dead giant spider clinging to his starlit corpse. News outlets soon broke the news that the cause of death wasn't actually murder but suicide, due to the fact that he was indeed dead from the waist down. And with that, the story of LESSOLICIOUS was suddenly over, leaving an entire internet community to ponder what happened to the man they loved. Then someone else began to play it. Someone else made themselves known as the Candyman, and he began speaking to LESSOLICIOUS's fans. He told his "colleagues" that he now knew what had happened that fateful day. Who knew where the Candyman was coming from, and what would he say next? Features: Create your own musical vision Play a tap-dancing character Switch from guitar to weird solos in the blink of an eye Amazing cartoon animations Over 40 instruments to play with (while modifying them) The new game SURVIVE! Subscriber feedback: ALL RIGHTS RESERVED by Superbrothers Inc. RELEASE PARTNER: EAA 16-year-old British schoolgirl has been freed after a court in Egypt c9d1549cdd

If you ever felt like playing a game of Conquest, Cossacks, Maritie or Total War all while in a comfortably seat on an airplane, then you're gonna love this game. The game has all the things that you'd expect from a game based on a recent add to the a list of games "Finally, a real strategy game for the iPad." It's got a vibrant atmosphere, awesome sprites and music, intuitive gameplay, a good arsenal of weapons and armor. I'd also add excellent combat animations and a decent touch combat system, but that's just nit picking. Read on for a blow by blow description of the game and its possible installation issues. Pros: .Great and intuitive iOS strategy gameplay .Large and well drawn sprites that look like they'd be at home on a Gameboy or NES .Over 60 soundtracks that are all equally good. Most of the tracks fit the game perfectly and offer a nice contrast. .Excellent sound effects .Multitouch combat system which is beautiful and takes into account the positions of your troops and the enemies to give just the right amount of damage .You can even swipe with one or both fingers to attack .Easy to learn but hard to master, meaning that it will give a challenge even to the most skilled gamer .The game plays fairly well even with large amounts of troops (1000+) .Doesn't take long to get going with a battle taking no longer than a few hours to complete .One of the most solid and stable iOS strategy games. . Cons: .Not many, but when you get one, it becomes pretty obvious. .Game not always very clear, I was looking at one of the help screens one day and I came across something like "to build units, move a troop to an unit that is completed or anywhere in the space surrounded by the blue square that is on the base panel". The screen was pretty quick flashing and meant nothing to me (turn based strategy). Actually, it might have been easier for me to play if that text had been split on 3 screens of different color indicating the different parts like it's done in the more advanced examples in the demo. .Game is a bit convoluted .There are lots of slow load and load times, making the game feel a bit laggy .The difficulty can be quite daunting, but that's a personal problem and not the fault of the game .The campaign is not overly long,
